Company Profile

Established Year: 1993

Capital size: 10M US Dollars

Core Business: Biomedical Instruments & Reagents

Head Quarter: Taipei, Taiwan

Production Factory: TaoYuang, Taiwan

Employee: 60 (Jan., 2007)

Overview

Avegene Life Science, headquartered in Taipei, Taiwan, develops, manufactures and markets a variety of biomedical instrument and reagent products that covers genetic, genomic, proteomic and medical diagnosis applications. Besides, Avegene provides professional OEM services. In Avegene OEM Laboratory, we're offering from re-labeling OEM to fully customized ODM services.

Joint-forces of innovation, teamwork and expertise make Avegene different from other biotech companies. We do not create something new but produce what you really need by making it more efficient, more accurate, more user-friendly and more reliable.

Vision

To become one of leading providers of total solution in healthcare industry by the integration of state-of-the-art techniques, in order to make a better living quality.

Mission

Acting as a professional OEM/ODM service provider, producing high C/P valued, innovative biomedical products in life science research market.

To establish a global commercialization platform for innovative healthcare products and services.

What's Avegene Doing

Effecting through appropriate joint force and teamwork of 3”P”s

▼ Product

Innovation, Quality, Reliability and Design

▼ Production

Highly skilled and quality-focused employees

Efficiency, TQM and Automation

▼ Partnership

Seeking partners for marketing and technological collaboration

R&D Capability

From components to system integration

▼ 4-year ODM experiences in working with leading biomedical companies

▼ 20 R&D staff covers H/W, S/W, F/W, E/E and M/E.

Creative Design Center

▼ More than 50% of R/D team obtained graduate degrees

▼ Own 15 patents related to bio-projects in last three years

Production Capability

Facility

▼ Clean room (class 5,000) environment

▼ Work cells and standard assembly lines

System

▼ ISO 9001 Certified, RoHs, WEEE

▼ Management Information System (M.I.S.)

▼ Quality Information System (Q.I.S.)

Automation

▼ Auto Production Process

▼ Auto Assembly robot (instrument)

▼ Auto dispensing robot (reagent)

▼ Tailor-made Auto Testing Program
